

CLIENT ENGAGEMENTS · MEASURED RESULTS

Software we built. Numbers it moved.

Six engagements across manufacturing, energy, sports, and financial markets — each one replacing spreadsheets or subscription software with a system the client owns outright.

ERP · TECHNOCRAFTS · PANEL & SWITCHGEAR MANUFACTURING

Cut manual data entry by 90% across a panel manufacturing floor

Technocrafts ran orders, bills of materials and design paperwork on spreadsheets and email. We replaced that with one ERP suite where an order, its BOM and its drawings all live in the same place.

90%

Less manual data entry

1

System instead of four

Live

Order status, no chasing

Ongoing

Partnership since day one

HRMS · KAYCEE ENERGY · SUBSTATION MANUFACTURING

Payroll that used to take a week now takes an afternoon

A full HRMS for a substation manufacturer — attendance, leave, payroll and statutory compliance in one place, with a self-service portal so HR stops answering the same questions.

70%

Faster payroll processing

100%

Statutory compliance maintained

Self-serve

Payslips and leave, no HR ticket

1

Source of truth for HR data

ERP · ABHITECH · CHEMICAL MANUFACTURING

An ERP the leadership team actually opens — because it answers questions

A custom ERP covering projects, tasks, employees, clients, plants and assets, with a conversational AI layer that lets directors ask about project health instead of hunting through dashboards.

All

Verticals on one system

Conversational

Insights, not just dashboards

Role-based

Access across the hierarchy

2

Products built and running

CRM · RALLYUP · SPORTS EVENT MANAGEMENT

45% more ticket sales after replacing a patchwork of tools

Wingman Pro — one platform for event planning, ticketing, attendee management and analytics, replacing a stack of separate tools that did not talk to each other.

45%

Increase in ticket sales

95%

User satisfaction

End-to-end

Plan, sell, track, analyse

Integrated

Payments reconcile themselves

TRADING SYSTEMS · STATEHILL CAPITAL · TRADING / FINANCIAL SERVICES

Sub-10ms execution for a Polymarket trading desk

A trading system built for latency — real-time market analysis, automated strategy execution and order placement fast enough to matter in a market that moves in milliseconds.

<10ms

Execution latency

Real-time

Market analysis

Automated

Strategy execution

Ongoing

Active engagement

ERP · MARCOS QUAY · SPORTING & TRAINING

Two phases, one system for events, training and registrations

An ERP for a sporting and training business — event scheduling, participant registration, training programmes and resource allocation, delivered across two completed phases.
