

ENTERPRISE SOFTWARE · AI SYSTEMS · DELIVERY TEAMS

Systems you own. Ops that run themselves.

Custom ERP, CRM, HRMS, payroll and automation for Indian businesses that have outgrown Excel and subscription software. We build it — you own the code and the data.

“Ditch the spreadsheets. Automate the back office. Cut SaaS sprawl — own the stack instead.”

WHAT WE BUILD

Jewellery ERP & CRM

Stock by weight, purity & category. Orders, billing, and customer history — built for how jewellers actually work.

Manufacturing ERP

BOM, production planning, quality checks, dispatch. Built for shop-floor teams, not just management.

Agentic AI workflows

Agents that reorder stock, flag overdue payments, and surface anomalies — with human approval before acting.

Trading systems

Sub-10ms dashboards, broker data, and NSE/SEBI compliance infrastructure for financial markets firms.

APPROACH

From messy data to running software.

Four stages from discovery to live operations — lean teams, agentic delivery, sovereign Indian hosting.

0 1

Map

We spend the first week mapping how your business actually runs — people, paperwork, bottlenecks.

0 2

Build

AI-native delivery: FastAPI, React, MongoDB, agents. Ship working modules in days, not months.

0 3

Automate

Embed agentic workflows with human-in-the-loop approval across ERP, CRM, HRMS, and ops.

0 4

Operate

Deploy on sovereign Indian cloud with Utho. Iterate from real client feedback — lean, no bureaucracy.

TRUST & INFRASTRUCTURE

ISO 9001 certified

ISO/IEC 27001 certified

GDPR & DPDP compliant

HIPAA-ready when scoped

Meta Tech Provider

Utho sovereign Indian cloud

NEXT STEP

Ready to transform your business?

Tell us about your MSME, manufacturing, or financial markets problem — we'll map it and ship AI-native software around how you actually work.
