

MANUFACTURING · JEWELLERY · ACADEMIA

Enterprise systems built around how you work.

ERP, HRMS, OMS, AI & analytics and automation — custom-built for organisations that have outgrown off-the-shelf SaaS. You own the source code and the data outright.

CAPABILITIES

0 1

ERP & Business Management

End-to-end operations for manufacturing and academia: inventory, procurement, production, and finance in one system.

0 2

HRMS & Workforce

Attendance, payroll, PF/ESIC/PT, leave, performance, and recruitment — tailored for enterprises and institutions.

0 3

OMS, Analytics & Reporting

Order management with real-time tracking, operational dashboards, and data-driven decision support.

0 4

AI, Automation & Apps

Agentic workflows, RAG tools, and modern web/mobile apps that remove back-office toil.

VERTICAL FOCUS

Jewellery

Stock by weight & purity, CRM, billing, and catalogue operations for jewellery teams.

Manufacturing

BOM, planning, QA, dispatch — designed for shop-floor teams and management alike.

Academia & energy

Institutional workflows, workforce systems, and ops automation with measured outcomes.

SELECTED OUTCOMES

What changed after we shipped.

Technocrafts

Manufacturing ERP — ~90% reduction in manual data entry; production visibility across the shop floor.

Kaycee Energy

HRMS & payroll — attendance, statutory compliance, and workforce ops for a growing energy team.

AbhiTech

ERP + AI automation — consolidated operations and agent-assisted workflows on systems they own.

RallyUp

CRM — ~45% more tickets handled with clearer ownership and follow-through.

WHY BUILD WITH EKALON

- Understand first, build second — we map your real process before writing code.
- You own the stack: source code and data, not another subscription lock-in.
- WhatsApp group with the engineers who built it — direct, 24×7 responsive.
- Sovereign Indian cloud (Utho) with ISO/IEC 27001-certified security controls.
- ISO 9001 certified quality practices; GDPR & DPDP compliance; HIPAA when scoped.
- Honest buy-vs-build advice — sometimes staying on your current tool is right.
